

Point of Sale System Agreement

Innovatif and The Phone Man

Sep 30, 2026 · @alam

1. Parties

This agreement is between **Innovatif**, represented by Alan Fernandez (the Provider), and **The Phone Man**, represented by Olu (the Client). It covers the supply, hosting and support of a custom point-of-sale system for The Phone Man's store. It takes effect on the date both parties sign in section 12.

	Provider	Client
Business	Innovatif	The Phone Man
Representative	Alan Fernandez	Olu
Email		
Phone		
Address		

2. Demo and trial period

The Client may try the demo version of the system free of charge for **7 days** from the date this agreement is delivered, before deciding to buy. The demo runs on sample data and is for evaluation only; it must not be used to run real sales.

Screen	Link	Demo login
Admin console	https://phonepos-demo.netlify.app/admin	admin@phoneman.store / admin123
Cashier portal	https://phonepos-demo.netlify.app/cashier	PIN 1111, 2222 or 3333 (manager 9999)

Screen	Link	Demo login
Customer display	https://phonepos-demo.netlify.app/display/reg_1	No login needed

The demo is meant to be opened on a computer, laptop or tablet in Chrome, Edge or Safari. Open the cashier portal and the customer display side by side to see them update each other live.

Important limitations of the demo:

- **A phone app is not yet available.** None of the three links above is supported on a mobile phone. Please test on a computer or tablet only.
- Demo data is stored in the browser you use. It is not shared between different computers, and it can be reset at any time from Admin, Settings, Data.
- Receipt printers, cash drawers and card readers are not connected in the demo. They are part of the production system described in section 3.
- The Provider may update or reset the demo during the trial without notice.

3. Scope of work

The Provider will deliver a production-ready point-of-sale system for The Phone Man, based on the demo in section 2 and connected to a live hosted database. The system is licensed for use at the Client's store on any number of registers.

Deliverable	What is included
Admin console	Dashboard, sales analytics, full transaction history with refunds and voids, catalog and category management, inventory with stock movements and IMEI tracking, purchase orders, suppliers, promotions, customer records with loyalty and store credit, repair tickets, staff accounts and permissions, registers and shift reports, activity log of every action, reports with CSV export, store settings

Deliverable	What is included
Cashier portal	PIN login for an unlimited number of cashiers, register selection, open and close shift with cash count, barcode, SKU and IMEI scanning, cart with discounts and promo codes, hold and recall sales, cash, card, mobile, store credit and split payments, refunds, cash in and out, receipt printing
Customer display	Second screen facing the customer showing scanned items, running total, payment status and a thank-you screen, following each register live
Hosted database	Live cloud database on Google Firebase so all registers, the admin console and the customer displays share the same data in real time, with daily automatic backups
Printer and cash drawer support	Configuration of the Client's receipt printers and cash drawers so receipts print and the drawer opens on cash sales, on up to 3 registers at go-live
Catalog import	Import of the Client's existing product list, prices, stock levels and customer list into the new system before go-live
Training	Up to 4 hours of on-site or video training for the owner and staff, plus a short written guide
30 days of support	Unlimited help by phone, message or remote session for 30 days after go-live to fix issues and answer questions

The system will be delivered on the Client's own web address (for example pos.thephoneman.com) or on an address supplied by the Provider.

4. Not included and known limitations

- **Phone app.** A mobile phone app is not yet available. The admin console, cashier portal and customer display are designed for computers, laptops and tablets and are not supported on phones. If a phone app is released later, the Client will be offered it under a separate agreement.

- **Hardware.** Computers, tablets, monitors, customer display screens, receipt printers, cash drawers, barcode scanners, card readers and networking are not included unless listed in a separate equipment quote.
- **Card processing.** Card payments are recorded in the system, but the card terminal and its processing fees are provided by the Client's payment provider.
- **Website.** The business website is quoted separately and is not part of this agreement.
- **New features.** Work beyond section 3, such as multi-store support, online ordering or accounting integrations, will be quoted separately.
- **Internet.** The system needs an internet connection to reach the database. The Client is responsible for a working connection at the store.

5. Price and payment

The total one-time price for everything in section 3 is **\$9,000 USD**. Hosting and the database are billed at **\$100 USD per month**, starting on the go-live date.

Item	Amount	When due
Deposit to start work	\$4,500	On signing
Balance	\$4,500	On go-live, when the system is running in the store
Hosting and database	\$100 per month	Monthly from go-live, in advance

The one-time price is fixed for the scope in section 3. Payment is by bank transfer, e-transfer or cheque to Innovatif. Invoices are due within 7 days. Prices exclude any applicable sales tax.

6. Hosting and database

The system's data is stored in a **Google Firebase** database managed by the Provider. The \$100 monthly fee covers the Firebase database and hosting costs, daily automatic backups, security updates and monitoring.

- The data (products, sales, customers, staff and reports) belongs to the Client at all times.
- The Client can export a full copy of their data at any time from Admin, Settings, Data.

- If the monthly fee is more than 30 days overdue, the Provider may suspend access until it is paid. Data is kept for at least 90 days after suspension.
- If the Client ends the hosting service, the Provider will hand over a complete export of the data within 14 days.
- Usage far above a typical single store (for example more than 5 registers or several locations) may require a revised monthly fee, agreed in writing first.

7. Warranty

The Provider gives a **4-year warranty** on the system, starting on the go-live date. If any part of the system stops working or does not work as described in section 3, the Provider will fix it **at no charge** to the Client.

The warranty covers:

- Bugs and errors in the admin console, cashier portal and customer display.
- Problems with the database connection, data sync between registers, or backups.
- Receipt printing and cash drawer functions set up by the Provider.
- Updates needed to keep the system running on current versions of Chrome, Edge and Safari.

The warranty does not cover:

- Faulty or damaged hardware, internet outages, or power failures at the store.
- Changes made to the system's code or settings by someone other than the Provider.
- New features or changes to how the system works, which are quoted separately.
- Loss of data caused by the Client deleting records or sharing login details.

The warranty applies while the hosting and database fee in section 5 is being paid. Warranty repairs are done remotely where possible; an on-site visit is arranged when needed.

8. Training and support

Before go-live the Provider will set up the Client's store details, tax rate, receipt text, staff accounts and PINs, and import the catalog. Training of up to 4 hours is included, split as the Client prefers between the owner (admin console) and the cashiers (selling, refunds, shift close).

For **30 days after go-live**, support is unlimited and free: questions, small adjustments to settings, and fixes. The Provider aims to respond within 4 business hours and to fix anything that stops sales the same day.

After the first 30 days, warranty fixes in section 7 stay free for 4 years. General help, retraining new staff and small changes are available at \$60 per hour, or under an optional support plan agreed separately.

9. Delivery, acceptance and client responsibilities

The Provider will have the production system ready within **4 weeks** of receiving the deposit and the Client's catalog and customer lists. The go-live date is agreed together, normally on a quiet day, and the Provider is present (on site or remotely) for the first day of live sales.

The system is accepted when the Client has run live sales on it for 5 business days without a defect that stops selling. Any defects found in that time are fixed before the balance is due.

The Client agrees to:

- Provide the product list, prices, stock counts, customer list and staff names in a spreadsheet or an export from the current system.
- Provide the computers, tablets, screens, printers, drawers, scanners and internet connection at the store, or order them through a separate equipment quote.
- Give the Provider access to the store and equipment for setup and training.
- Keep staff PINs and the admin password private and tell the Provider promptly if a staff member leaves.

10. Ownership, data and confidentiality

The Client owns all business data entered into the system. The software itself, including its code and design, remains the property of Innovatif. The Client receives a permanent, non-transferable licence to use the system for The Phone Man's business for as long as this agreement is in force, and the Provider may reuse the underlying code for other clients.

Both parties will keep each other's confidential information private, including sales figures, customer lists, prices and login details, and will not share it with third parties except as needed to deliver the service (for example Google Firebase as the hosting

provider).

The Provider will apply reasonable security measures, including per-user PINs and passwords, encrypted connections and daily backups. The Provider's total liability under this agreement is limited to the amounts paid by the Client in the previous 12 months.

11. Term, termination and general terms

This agreement starts on signing and continues while the Client uses the system. Either party may end the hosting service with 30 days' written notice. On termination the Provider delivers a full data export as described in section 6, and the licence in section 10 ends unless the parties agree a self-hosting arrangement in writing.

If the Client cancels before go-live, the deposit covers work already done and is not refunded once setup or catalog import has started. If the Provider cannot deliver the system described in section 3, the deposit is refunded in full.

Changes to this agreement are valid only in writing signed by both parties. If any clause is found unenforceable, the rest of the agreement remains in effect. This agreement is governed by the laws of the province or state where The Phone Man's store is located.

12. Signatures

By signing below, both parties agree to the terms of this agreement.
